How to Use this App??

This Application is a complete Proctoring Solution that includes head tilt detection, People detection, Application change, Tab change, browser size and gaze detection. The tool is extremely simple to use and we just ask google form link to conduct the test. I have made this process extremely simple, and I am sure teachers would love it

Overview First

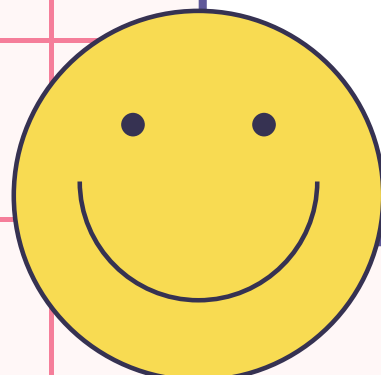

Steps For Teachers

Step No 1

1. First, go to `letsproctor.herokuapp.com` website.
2. Then click "Make Test" tab.
3. In the first field put the subject name and then google form link. After that put your email. We will be soon sending a mail.
4. You will get a unique id. This should be sent to the students as exam code which will be used by them during exam.

Steps For Students

Step No 2

1. Students too will visit `letsproctor.herokuapp.com` website.
2. Click the download button. And download the zip file
3. Unzip the file and run exe file
4. After that you will see a prompt asking name, Roll no, Email id and key for exam.
5. Now a edge browser will be opened.

Steps For Students

6. A small live video feed will be also opened
7. In web page put your email id and unique code. Make sure it's correct because according to that QR code will be generated
8. A exam page will be opened and you will find google form embedded in the frame. Now you can give exam
9. Make sure you don't change tabs, applications, tilt head etc as your every action will be monitored

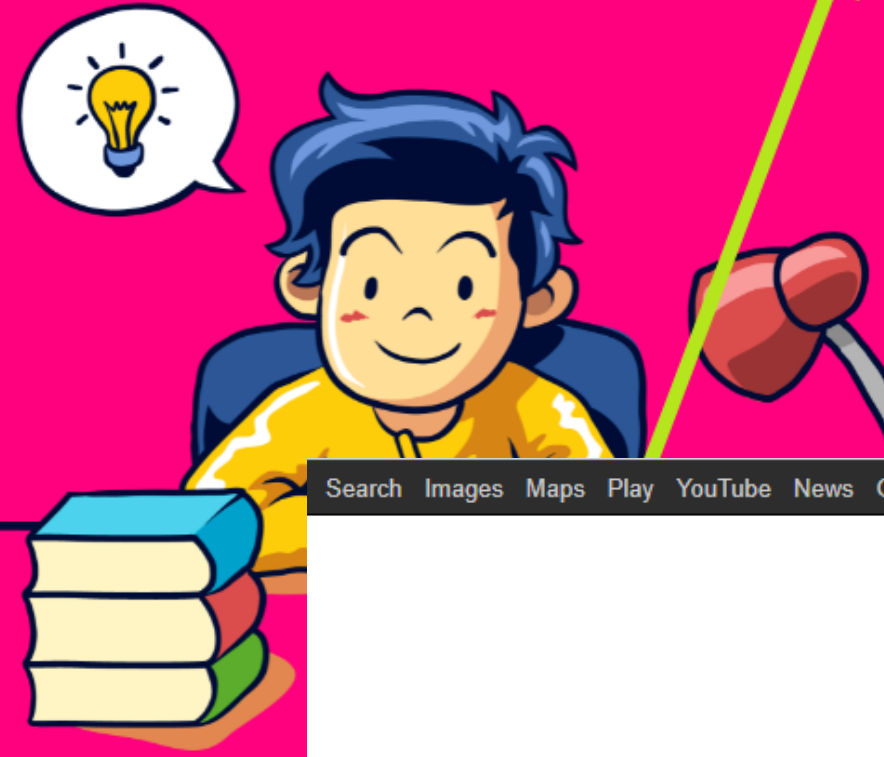

What this App is about?

This Application is a complete solution for proctoring students during online exam. Online Education has many benefits but one disadvantage is that during exam its difficult to supervise students. So I made this app that is extremely simple to use even for people who are not well versed with technology. Also as we know that most of the teachers use Google form to conduct exam, that's why in this application too we will be asking user just a Google form link and rest all the things will be done by us.

Features in this application are as follows

- Head Tilt Detection ✓
- Number of People Detected ✓
- Tab Change Detection ✓
- Application Change Detection ✓
- Browser Size Detection ✓

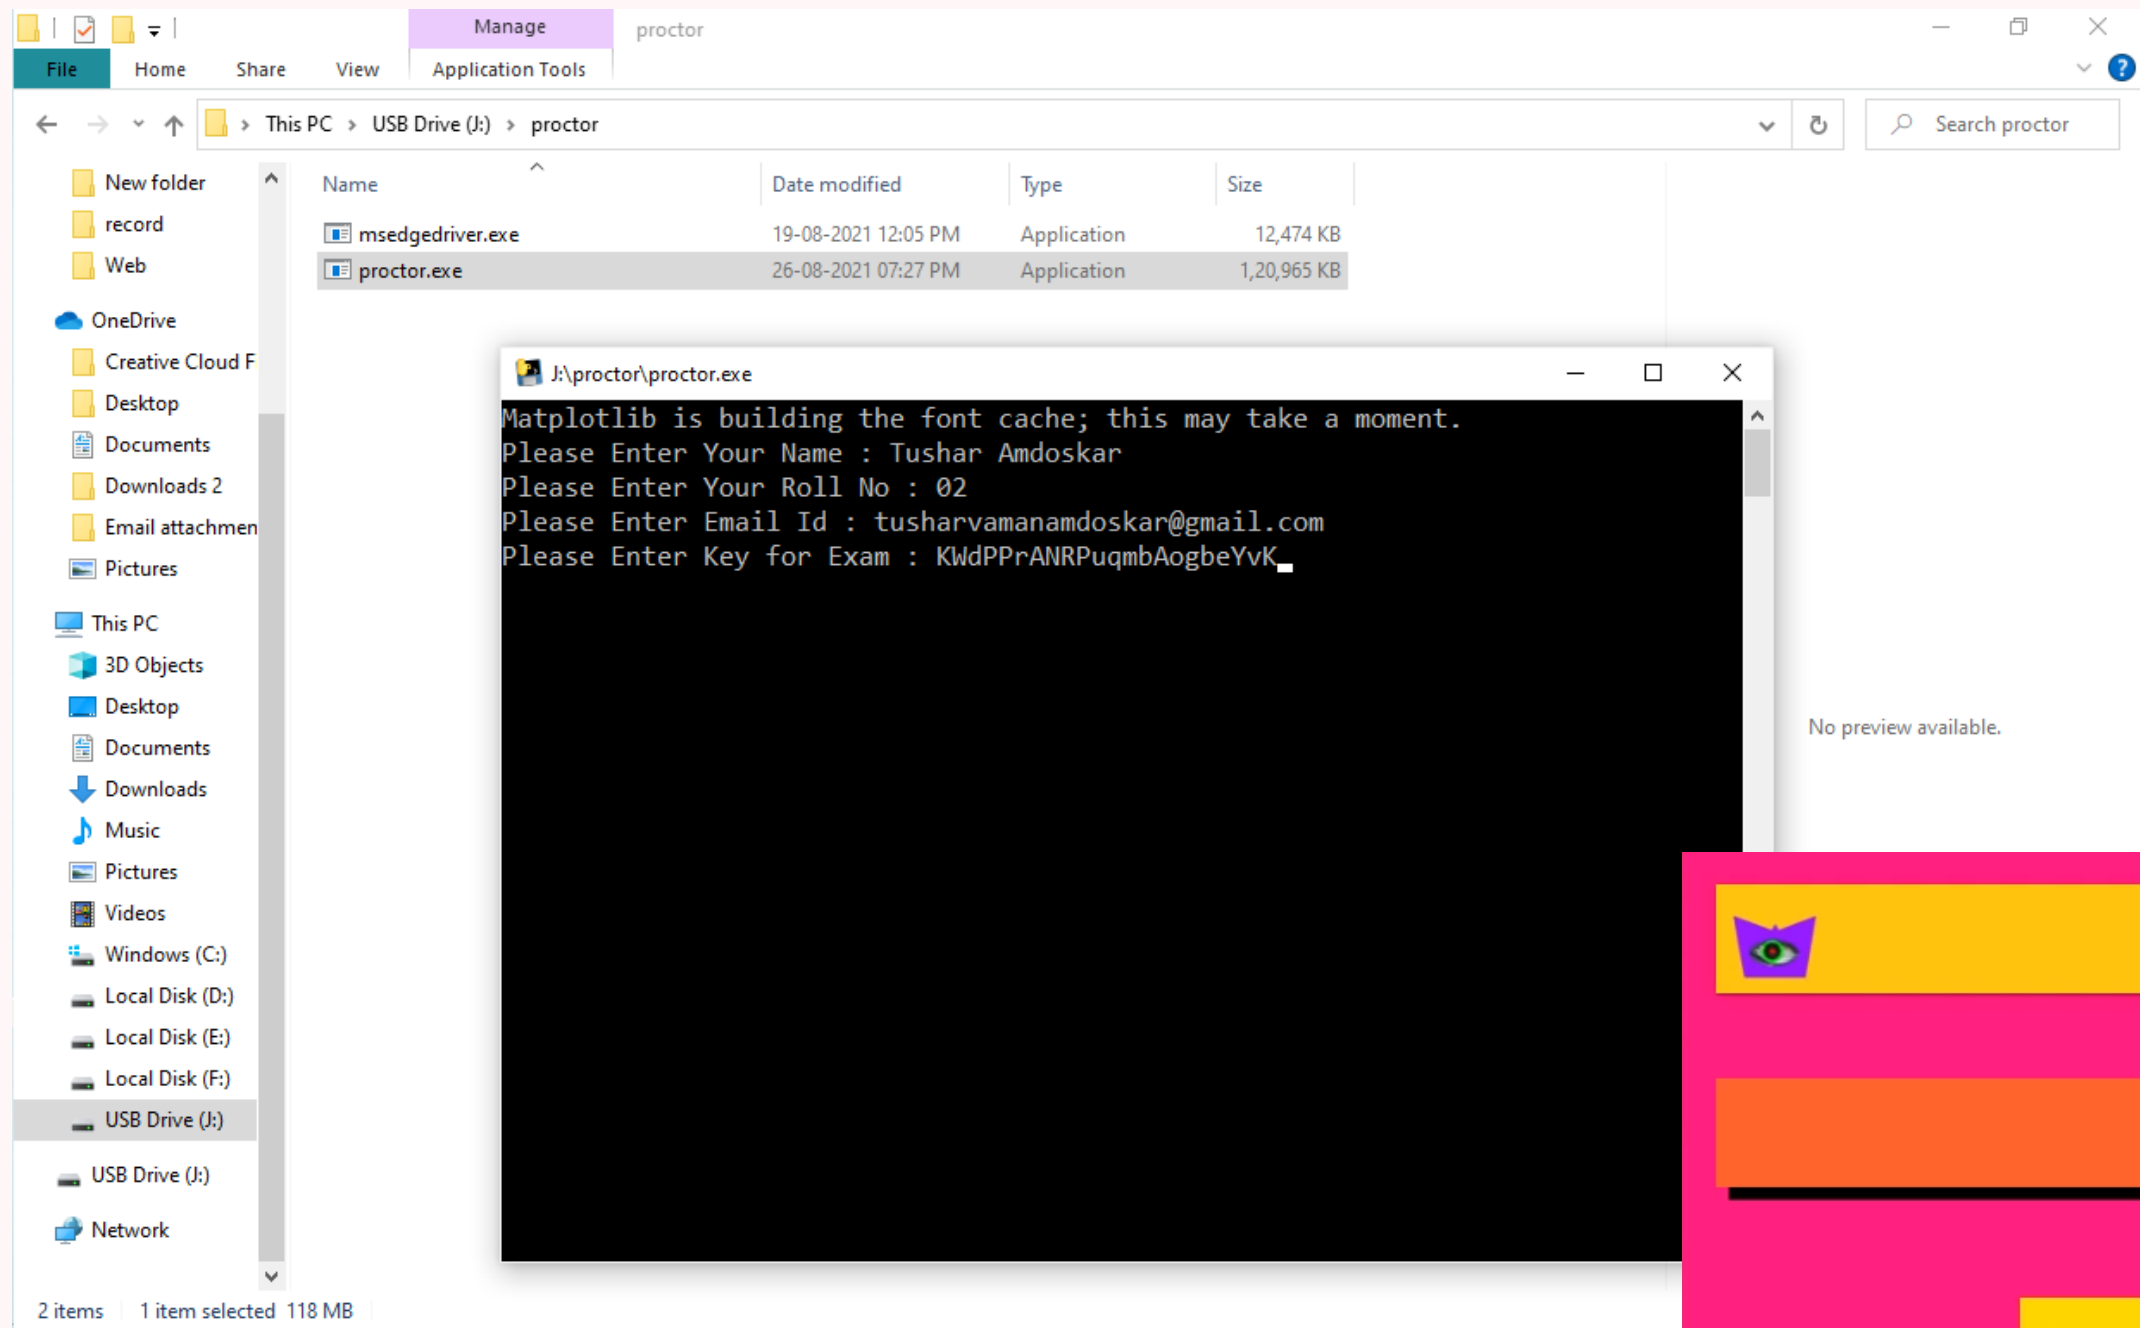

Google Drive can't scan this file for viruses.

[proctor.zip](#) (123M) is too large for Google to scan for viruses. Would you still like to download this file?
